## Introduction

Enterprise Home Screen (EHS) is a replacement application launcher for Symbol Android devices, designed to allow only specified applications to be launched.

## Description

- New feature to enable/disable device reboot when EHS is first launched after a successful installation. To use this feature, use the "reboot\_on\_install\_enabled" option in the configuration file. By default, EHS will not reboot after the installation. Refer to the "Enable device reboot on install" section in the EHS User Guide for detailed information.
- Support for TC8000 KitKat version 4.4 (Added January 2016)\*

\* New device approval has been received for this package. The approval did not require any software changes. If you have already installed the package, there is no need to download and install it again.

## Contents

1. EHS\_020300.zip
