Release Notes - IPWedge v1.2 for DataWedge

Important News

Now IPWedge is supporting all Symbol devices having Android OS versions : Jelly Bean, KitKat, Lollipop, Marshmallow, and Nougat.

Introduction

IPWedge is an application which allows a device running DataWedge to act as a cordless scanner. IPWedge runs on a desktop PC, receives data from the IP Output Plug-in for DataWedge and sends that data to the foreground window on the desktop PC as either keystrokes or via the clipboard.

Description

IPWedge v1.2 has following features.

1. Rebranded as Symbol Technologies LLC. As part of rebranding:
   - Help files updated with the Symbol copyright message, and all reference to company name.
   - Installation updated with the Symbol EULA.
   - Version information of all binaries modified to include Symbol copyright message.
2. Added support for Android devices (OS versions: Jelly Bean, KitKat, Lollipop, Marshmallow and Nougat) (Updated Dec 11th, 2017)
